

THE NEW GENERATION OF FULL WIDTH TEMPLE

*Just clamp the upper profile onto the lower profile,
arrange the fabric path and start to weave !*

The new generation of Full Width Temple from Hunziker AG, Rüti

Advantages when mounting:

- *Mounting lower profile on existing brackets or with the supports supplied by Hunziker*
- *Guide the fabric through the Full Width Temple (over / around the rod)*
- *Clamp the upper profile onto the lower profile (ready), no screwing*
- *Guide the fabric through the cloth take-up*
- *Stress the fabric*
- *Run the machine*
- *Lower the warp tension step by step*

Advantages of the Full Width Temple (FWT) in general:

- *Weaving with lower warp tension*
- *Less stress for the ends, consequently less end breakage's = higher efficiency*
- *No temple ring marks*
- *Higher weft density possible*
- *Straight weft insertion over the whole width*
- *Less maintenance*

Suitable for:

- *Sulzer Projectile with cutted selvedge*
- *Dornier Rapier*
- *Picanol Air, Rapier GTM / GTX*
- *Vamatex Rapier*
- *SulzerTextil G6200*
- *Nuovo Pignone Fast*
- *Others on request*

Rods available:

- *Steel smooth 14 mm*
- *Synthetic smooth 10, 14, 18 mm*
- *Steel LH-/RH threaded 14, 18 mm*
- *Steel knurled 14 mm*
- *Synthetic LH-/RH threaded 10, 12, 14, 16 18 mm*
- *Synthetic knurled 10, 14, 18 mm*
- *PUR (rubber coated) 10, 12, 14, 18 mm*
