

Maintenance and Cleaning

When: When changing the warp or when marks appear in the fabric.

1. Take off the rings and Ellipses one after the other (put them on the working table in a proper row)
2. Check the rings regarding bent or broken pins; use our Pin Control Apparatus.
3. Clean ring, ellipses and bolt with a slightly oily rag (Vaseline öl)
4. Mount the rings in the reverse order (see 1).
5. Observe that the ellipses are mounted tight on the bolt.
